

InrCliq Feed/Post Item

Brief feature list for an InrCliq Feed/Post item.

1. Creating a Post and Adding Content

What the author can include when creating a post and adding content.

1.1 Text

Short or longer caption / description lines on the post.

1.2 Images

One photo or several photos in the same post.

1.3 Videos

One video or several videos in the same post.

1.4 Tag people

Mention / tag other people on the post.

1.5 Feeling / activity

Add how the author feels or what they are doing.

1.6 Location (check-in)

Tag a place where the post is from.

1.7 GIF

Pick a GIF from the library and add it to the post.

1.8 Exclusive content option

Mark the post as exclusive (members-only) content — Yes / No. Available to verified users only.

2. Posted date / time

Shows when the post was published in relative form (e.g. Just now, 2h, 30m, 1d, 4w).

3. Likes

Like icon plus like count. The control supports a maximum number of clicks.

4. Comments

Shows how many comments the post has. Clicking the comments icon opens a popup with comments.

5. Profile image

Author's profile photo on the post. Clicking it takes the viewer to that user's public profile.

6. User name

Author's display name. Clicking it takes the viewer to that user's public profile.

7. User handle

Author's @handle.

8. Verified state

If the author is verified, a star icon is shown.

9. Follow user

Button to follow that author.

10. Share

Share icon to share the post.

11. Bookmark

Bookmark icon to save the post.

12. Exclusive content flag

If the content is exclusive, a locked icon is shown. Indicates whether a subscription is required to view the content.

User stories — creating a feed item

Actors:

- **Normal user** — signed-in member who is not verified.
 - **Verified user** — signed-in member with verified status (star).
-

US-FEED-ADD-01 — Open create post (normal or verified)

As a normal or verified user

I want to open "Creating a Post and Adding Content"

So that I can compose a new feed item.

Acceptance criteria

1. I can open the create-post composer from the feed.
 2. The composer shows the options listed under Creating a Post and Adding Content (§1).
-

US-FEED-ADD-02 — Add text to a post

As a normal or verified user

I want to add lines or a description of text

So that my post has a caption.

Acceptance criteria

1. I can enter one or more lines of text.
 2. I can publish with text only, or with text plus other add-ons.
-

US-FEED-ADD-03 — Add images to a post

As a normal or verified user

I want to add a single image or multiple images

So that my post can show photos.

Acceptance criteria

1. I can attach one image.
 2. I can attach more than one image on the same post.
 3. Images can be combined with text and other add-ons.
-

US-FEED-ADD-04 — Add videos to a post

As a normal or verified user

I want to add a single video or multiple videos

So that my post can show video content.

Acceptance criteria

1. I can attach one video.
 2. I can attach more than one video on the same post.
 3. Videos can be combined with text, images, and other add-ons.
-

US-FEED-ADD-05 — Tag people

As a normal or verified user

I want to tag people into the post

So that those people are linked on my post.

Acceptance criteria

1. I can search/select people to tag.
 2. Tagged people are saved with the post when I publish.
-

US-FEED-ADD-06 — Add feeling / activity

As a normal or verified user

I want to add a feeling or activity tag

So that viewers see what I'm feeling or doing.

Acceptance criteria

1. I can choose a feeling or activity.
 2. The feeling/activity is shown on the published post.
-

US-FEED-ADD-07 — Check in with a location

As a normal or verified user

I want to tag a location (check-in)

So that viewers know where the post is from.

Acceptance criteria

1. I can select a location for the post.
 2. The location is shown on the published post.
-

US-FEED-ADD-08 — Add a GIF from the library

As a normal or verified user

I want to tag a GIF from the library

So that my post includes an animated GIF.

Acceptance criteria

1. I can browse/select a GIF from the library.
 2. The GIF is included when I publish.
-

US-FEED-ADD-09 — Publish as a normal user

As a normal user

I want to publish my feed item

So that it appears on the Main Feed with my identity.

Acceptance criteria

1. After publish, the post shows my profile image, user name, and user handle.
 2. Verified star is **not** shown on my post (I am not verified).
 3. Exclusive content flag is **No** — I cannot mark the post as exclusive.
 4. Posted date/time shows in relative form (e.g. Just now).
 5. Likes, comments, share, and bookmark controls are available on the post for viewers.
 6. Other users see a Follow button on my post.
 7. Clicking my profile image on the post opens my public profile.
-

US-FEED-ADD-10 — Publish as a verified user

As a verified user

I want to publish my feed item

So that it appears on the Main Feed with my verified identity and optional exclusive content.

Acceptance criteria

1. After publish, the post shows my profile image, user name, and user handle.
 2. Verified state is shown with a **star icon**.
 3. I can set Exclusive content flag to **Yes** or leave it **No**.
 4. If Exclusive = Yes, the post is treated as members-only exclusive content.
 5. Posted date/time shows in relative form (e.g. Just now).
 6. Likes, comments, share, and bookmark controls are available on the post for viewers.
 7. Other users see a Follow button on my post.
 8. Clicking my profile image on the post opens my public profile.
-

US-FEED-ADD-11 — Exclusive content only for verified users

As a normal user

I want exclusive posting to be unavailable to me

So that only verified users can publish exclusive content.

Acceptance criteria

1. Normal user composer does not allow Exclusive = Yes.
 2. Verified user composer allows Exclusive = Yes / No.
 3. Published exclusive posts show Exclusive content flag = Yes.
-

US-FEED-ADD-12 — Combined add-ons on one post

As a normal or verified user

I want to combine several options from Creating a Post and Adding Content in one item

So that a single post can include text, media, tags, and context together.

Acceptance criteria

1. I can publish any allowed combination of text, images, videos, people tags, feeling/activity, location, and GIF.
 2. All selected add-ons appear on the published feed item.
 3. Verified-only exclusive flag still follows US-FEED-ADD-10 / US-FEED-ADD-11.
