InrCliq Prototype — Feature List (Detailed)

Document	Prototype feature inventory (page and control level)
Prepared	4 October 2026
Code version	`main` @ `b51a904`
Audience	Business analysts, product owners, stakeholders

InrCliq is a creator-led social platform. Fans follow creators, browse a feed, shop creator collections, book personalised "Special Requests" and message creators. Under-18 users join through parent/guardian approval, and guardians get a Family Circle dashboard with direct-message (DM) safety controls.

This document lists what the prototype does today, down to the individual sections, buttons and controls on each page, and states clearly where something is not finished.

How to read this document

Each main feature is split into pages or areas. Each area has a table:

- **Feature** — the section, button, field or behaviour.
- **What it does** — a short description of what works today.
- **Status** — one of the values below.
- **Missing / not yet built** — gaps, shortcuts, fake data and known problems. A dash (—) means nothing notable is missing.

Status	Meaning
Working	Built end to end; data is saved and survives a page reload (or the control genuinely does its job).
Partial	Works, but an important part is missing or faked.
Simulated	Looks real on screen, but nothing actually happens behind it: fake or hardcoded data, nothing saved, no payment, no sound.
Placeholder	Shown on screen but does nothing: "Coming soon", disabled, no click action, or a link that goes nowhere.
Not built	Expected feature that does not exist yet.

Summary

#	Main feature	Overall status	In one line
1	Access & Accounts	Working	Email signup, email-code and password login, sessions. Google/Apple sign-in is faked or disabled.
2	Onboarding	Partial	Password and handle steps work; chosen interests are not saved.
3	Minor Signup & Guardian Approval	Partial	Full parent-approval journey works; guardian ID and face scan are simulated.
4	App Navigation	Partial	Main menu works; Explore, Purchases and Notifications go nowhere.
5	Home Feed	Partial	Real posts, follow, hide and delete; reactions, comments, share and bookmarks are not saved.
6	Create Post	Working	Text, photos, video, location, feeling, tags, members-only. GIFs are a fixed list; cross-posting not live.
7	Audio	Simulated	Rich Audio page built entirely on sample data; no player makes any sound.

#	Main feature	Overall status	In one line
8	Photos, Videos, Snaps	Placeholder	"Coming soon" pages.
9	Profiles & My Account	Partial	Profiles, follow, subscribe and avatar work; profile details cannot be edited.
10	Creator Shop	Simulated	Real product catalog; bag and checkout are simulated, no order is saved.
11	Special Requests (Fan side)	Partial	Full booking wizard creates real bookings; payment is simulated.
12	Messages	Working	Real one-to-one chat, text only, refreshes every 4 seconds.
13	Calendar (Bookings)	Working	Full offer, counter-offer, delivery and feedback flow; payments simulated.
14	Seller Tools	Partial	Storefront, products, service catalog and availability work; some stats are fake; Wallet and Subscriptions are placeholders.
15	Family Circle (Guardian Dashboard)	Partial	Real children, alerts and DM controls; scores, Controls and Requests are simulated.
16	DM Safety & Content Moderation	Working	Messages to minors are checked, held for guardian review and repeat offenders restricted.
17	Platform Admin (Settings)	Working	Dashboards, users, AI users, feed management, seed data and partners.
18	Partner Feed API	Working	External partners publish posts with API keys.
19	Platform & Infrastructure	Partial	Demo password gate, analytics, email, file storage, one scheduled job.

A list of **known defects** found during this review is at the end of the document.

---

1. Access & Accounts

1.1 Shared controls (all sign-in, onboarding and guardian screens)

Feature	What it does	Status	Missing / not yet built
Demo password gate	Hosted site asks for a shared browser username/password before any page loads.	Working	Shared demo password, not real access control.
Logo	Links to the login page; hides on scroll.	Working	—
Theme switcher (sun/moon)	Toggles light and dark mode.	Working	Saved in the browser only.
Prototype controls > Reset Prototype	Logs out and clears this browser's saved app data.	Working	Does not delete accounts (the confirmation says so).
Prototype controls > Settings	Asks for the admin password and opens the admin area.	Working	—
Signup progress bar	Fills as the user moves through signup and onboarding.	Working	Visual only.

1.2 Prototype consent popup (login page)

Feature	What it does	Status	Missing / not yet built
Data Privacy & Consent text	Explains what is collected, why, how long (deleted by 31 Oct 2026) and user rights.	Working	No real deletion job behind the 31 Oct date.
Contact email link	Opens the user's email app.	Working	—

Feature	What it does	Status	Missing / not yet built
"I agree" checkbox + Continue	Enables Continue and closes the popup.	Partial	Consent is remembered only for the browser tab session and not saved on the server; analytics load regardless of consent.

1.3 Login page

Feature	What it does	Status	Missing / not yet built
"Create a free account"	Goes to signup.	Working	—
Continue with Google / Apple	Buttons shown.	Placeholder	Disabled; no Google/Apple sign-in.
Email field	Validates the email address.	Working	—
Send login code	Emails a 6-digit code (valid 10 minutes, 30-second resend wait). Unknown or unverified emails get clear messages.	Working	The code is also returned to the browser for the demo inbox (prototype shortcut, not secure).
6-digit code field	Digits only; logs in automatically when 6 digits are typed.	Working	—
Countdown + Send again	30-second countdown, then resend.	Working	—
Change email on code step	—	Not built	No back/change-email control on the code step.
Demo inbox (envelope button)	Shows the login-code email with a Copy code button.	Simulated	Demo aid only.
Use password to login	Switches to email + password.	Working	—
Password login	Email + password with show/hide; clear errors (wrong password, no password set, unverified).	Working	No lockout or rate limit on wrong attempts.
Forgot login details?	Goes to Forgot login.	Working	—
Already logged in	Sends the user to their next onboarding step or the feed.	Working	—
"I am done for now" landing page (`?parentDone=1`)	Bare page with "placeholder home screen" text and Log out.	Placeholder	Unstyled, no real content.
Bad "Continue signup" email link	—	Not built	User lands on login with no error message.

1.4 Sign up

Feature	What it does	Status	Missing / not yet built
Age requirements notice	Says age rules depend on country.	Partial	Real rule is "under 18 = minor" in every country.
Continue with Google / Apple	Prefills a fixed demo name and continues.	Simulated	No real Google/Apple; creates a made-up email and skips verification.
Continue with email	Goes to the details step.	Working	—
Terms and Conditions / Privacy Policy links	—	Placeholder	Links go nowhere; no legal pages.
Email, first name, last name	Validated with clear messages.	Working	—
Date of birth (month / day / year)	Decides adult or minor and the age zone.	Partial	Impossible dates (e.g. 31 Feb) are accepted and roll over. No minimum age.

Feature	What it does	Status	Missing / not yet built
Country	Sri Lanka, United States, United Kingdom, Australia, India.	Working	Only 5 countries.
State (US only)	Required for the United States.	Working	Missing state shown as a browser alert box.
Next	Creates the account, emails a verification link.	Working	An unverified email signing up again overwrites the earlier attempt.
Verify step: Change email (pencil)	Returns to the details step.	Partial	After a page reload the form comes back empty and fails.
Verify step: Resend email	Sends a new link with a 30-second countdown.	Working	—
Verify step: "What to look for"	Explains sender, subject, arrival time and 24-hour validity.	Partial	Quotes a slightly different subject from the real email.
Verify step: Demo inbox	Shows the verification email with a working button.	Simulated	Demo aid only.

1.5 Verify email and Forgot login

Feature	What it does	Status	Missing / not yet built
Verification link	Confirms the email (single use, 24 hours), logs the user in and continues onboarding.	Working	—
Expired / invalid link screen	Error with "Back to signup".	Working	—
Forgot login	Sends a one-time login code.	Partial	No password reset or change-password flow.
Sessions & logout	Sessions last 30 days; logout ends the session.	Working	—

2. Onboarding

Feature	What it does	Status	Missing / not yet built
Step routing	Sends each user to their next unfinished step.	Working	—
Password: password field + show/hide + live rule tick	8+ characters, letters and numbers.	Working	No confirm-password field or strength meter.
Password: Next / Skip	Saves the password, or skips (user logs in with email codes).	Working	—
Handle: handle field	Prefilled suggestion; up to 24 characters; letters, numbers, `_` and `.`.	Working	No live "is it available" check while typing.
Handle: Next / Skip	Saves the handle and creates the public profile; "already taken" error.	Working	—
Interests: 12 interest chips	Music, Sports, Gaming, Fitness, Food, Travel, Fashion, Technology, Finance, Art, Lifestyle, Education.	Partial	Selection is on screen only.
Interests: Continue	Completes onboarding, adds demo chats, sends "profile ready" email, opens the feed.	Partial	**Chosen interests are not saved** and do not personalise anything.
Interests: "Update these later" hint	—	Not built	No page to change interests.

Feature	What it does	Status	Missing / not yet built
Welcome demo chats	New users get sample conversations with creators.	Working	Demo creators never reply.

3. Minor Signup & Guardian Approval

3.1 Age zones

Feature	What it does	Status	Missing / not yet built
Age zones	Kids (under 13), Teens (13–15), Mature Teens (16–17), Adult (18+), from date of birth.	Partial	Only affect DM safety rules and labels — not the feed or profiles. Nothing happens on a birthday that moves a child up a zone.

3.2 Child side

Feature	What it does	Status	Missing / not yet built
Parent invite: parent email field	Rejects the child's own email; 30-second resend wait.	Working	—
Parent invite: "Here's what we'll send them" preview	Shows the email preview.	Partial	Wording differs slightly from the real email.
Parent invite: Send email	Emails the parent an approval link valid for 24 hours.	Working	Expired invites are never marked "Expired".
Parent invite: "I'm actually 18+"	Correct date of birth; if 18+, the account becomes adult.	Working	Age zone not recalculated straight away.
Waiting: automatic status check	Checks every 4 seconds and moves on when approved.	Working	—
Waiting: status card and "Pending" badge	Shows email sent and time until expiry.	Partial	"Just now" and "Pending" are fixed; never shows "Expired".
Waiting: "Temporary account for 48 hours" notice	—	Simulated	Not enforced.
Waiting: Resend email	Sends a new link; cancels the old one.	Working	—
Waiting: Use a different parent email	Back to the invite step.	Working	—
Waiting: Declined state	"Request declined" with "Try a different parent email".	Working	—
Waiting: Demo inbox	Shows the parent's email with a working "Review request" button.	Simulated	Demo aid only.
Approved: "Your parent approved!" + Continue	Moves the child on to password setup.	Working	—
"Continue signup" email link	Signs the child in (valid 72 hours).	Working	—

3.3 Guardian approval journey

Feature	What it does	Status	Missing / not yet built
Link checks	Missing, invalid, expired or used links show an error.	Partial	One generic message for all cases; dead end with no button.

Feature	What it does	Status	Missing / not yet built
Landing: "{Child} wants to join" + feature cards + steps	Explains the process.	Partial	One card says approval is needed "under 16" (rule is under 18). Mentions a "$1 card hold" that does not exist.
Landing: "Explore more about InrCliq"	Goes to the login page.	Partial	No marketing page.
Landing: Set up parental control	Starts the journey (create account, or continue if already a guardian).	Working	—
Landing: Decline	Confirms, marks the request declined and emails the child.	Working	Says details are "deleted" — nothing is deleted.
"Already have an account? Log in"	Login popup prefilled with the parent email.	Working	—
Step bar (Account · Verify · Review · Protection · Approved)	Shows progress.	Working	Not clickable.
Account: email (read-only)	Shows the parent email.	Working	—
Account: Edit email (pencil)	—	Placeholder	Does nothing.
Account: password, country, state, confirmation checkbox	Creates the guardian account.	Working	No name or date-of-birth fields; name is made up from the email.
Account (signed-in guardian): Continue approval	Skips to protection level.	Working	—
Child sidebar: name, age, email, DOB, country, sent date	Real child details.	Working	—
Child sidebar: Edit name / DOB / country (pencils)	—	Placeholder	Do nothing.
Verify intro	Explains ID + face scan.	Working	—
ID scan: document type (Passport / National ID / Driving licence)	Selectable.	Partial	Not saved.
ID scan: live camera + Capture ID	Camera opens; capture shows a 2-second progress bar.	Simulated	Nothing is captured, uploaded or checked.
Face scan: selfie camera + Capture selfie	Same as ID scan.	Simulated	No face match.
Verifying	Checklist animation, always passes after ~5 seconds.	Simulated	Promised "we'll email you" is never sent.
Review: "Identity verified" + extracted ID details	Shows name, date of birth, ID type and ID number.	Simulated	All made up; nothing stored. Guardian date of birth never saved.
Review: "{Child} lives with me" + country/state	Records where the child lives.	Working	Missing US state only caught at the final step, where there is no back button.
Protection level: Strict / Standard / Relaxed cards	Guardian picks a level; each card lists rules (DMs, comments, screen time, creators).	Partial	**Level is saved but none of the listed rules are enforced.** Standard is always recommended regardless of age.
Protection level: Approve and activate	Approves, links guardian and child, emails the child.	Working	No back or decline button on this step.
Success: "{Child}'s account is live!" + summary + checklist	Confirms approval.	Partial	Overstates — child still has onboarding steps left.

Feature	What it does	Status	Missing / not yet built
Success: Go to Family Circle	Opens the guardian dashboard.	Partial	A newly created guardian is not logged in, so lands on the login page.
Success: I am done for now	Goes to a bare placeholder page.	Placeholder	—
Change protection level later	—	Not built	No screen to change it after approval.
Invite a second guardian	—	Not built	Data model supports it; no screen.

3.4 Emails in these journeys

Feature	What it does	Status	Missing / not yet built
Verification, login code, parent invite, child approved, child declined, profile ready	Sent via SMTP (or written to the server log when SMTP is not set up).	Working	Declined email's button goes to login rather than to "try another parent".
Guardian welcome, "identity verified", password reset, approval reminders	—	Not built	—

---

4. App Navigation

4.1 Desktop left menu

Feature	What it does	Status	Missing / not yet built
Logo	Goes to Home.	Working	—

Known defects found during this review

#	Area	Defect
1	Seller Tools > Service requests > Inbox	Accept fails for approval-type bookings ("Send a new offer first"), and the Inbox has no Send offer button.
2	Seller Tools > Category	Instant booking tooltip says bookings are approved automatically after payment; they are not.
3	Special Requests checkout	Booking total is passed in the page address and accepted by the server without recalculation.
4	Shop bag	Any unknown promo code shows as "applied" with $0 discount.
5	Shop checkout	Bag is not emptied after "Order placed".
6	Audio > Top Music Chart	Most rows play the wrong song; chart includes a podcast and an audiobook.
7	Audio > Top Podcasts / Top Audiobooks	Ranks 6–10 repeat ranks 1–5.
8	Home feed	Members-only posts can't be unlocked by subscribers or by the author.
9	Home feed / Create Post	New posts show "Just now" forever.
10	Family Circle > Child detail	Posts tab always says the child has not posted, even when they have.
11	Family Circle > DM contact	"Require approval for messages" is saved but not enforced.
12	Admin > Seed settings	"Delete demo users" says their posts are removed; they stay in the feed.
13	Guardian approval	Newly created guardian is not logged in after approval, so "Go to Family Circle" lands on the login page.
14	Onboarding > Interests	Chosen interests are thrown away.

Biggest gaps across the prototype

1. **Payments** — every payment is simulated: shop checkout, Special Request deposit and balance, refunds, Verified membership and creator subscriptions. No payment provider, wallet or payouts.
2. **Engagement** — reactions, comments, shares and bookmarks are not saved; like/comment counts are fixed.
3. **Notifications** — no notification centre, push or emails for bookings or guardian safety alerts.
4. **Search & discovery** — no global search or Explore; the feed is not personalised by interests or follows.
5. **Protection levels & age zones** — don't change what a child can see or do (apart from DM safety).
6. **Guardian identity verification** — ID and face scan are simulated.
7. **Trust & Safety back office** — no console for reports, strikes or bans; mandatory reporting not connected.
8. **Shop orders** — no order records, inventory or seller notifications.
9. **Members-only content** — cannot be unlocked.
10. **Media** — Photos, Videos and Snaps are placeholders, audio never plays, messages are text only.
11. **Profile editing** — users can't edit name, bio or an existing handle.
12. **Admin security** — single shared admin password; no admin roles or audit trail.
